"The social philosophy of black nationalism only means that we [the African Americans] have to get together and remove the evils, the vices, alcoholism, drug addiction and other evils that are destroying the moral fiber of our community. We ourselves have to lift the level of our community, the standard of our community to a higher level, make our own society beautiful so that we will be satisfied in our own social circles and won't be running around trying to cram our way into a social circle where we're not wanted."
