

HEALTH DISPARITIES

Health Disparities

presented by

Bruce W. Randolph, MD, MPH

HEALTH DISPARITIES IN SHELBY COUNTY, TN

Disclosures: No Conflicts of Interest

Objectives

1. Discuss the health disparities that exist in Shelby County Tennessee.
2. Discuss contributing factors associated with these health disparities.
3. Discuss solutions for resolving these health disparities.
4. Discuss the role of physicians and other health care providers in decreasing health disparities.

Data presented can be found at

<https://www.healthiershelby.com/indicators/index/dashboard>

This presentation can also be found at

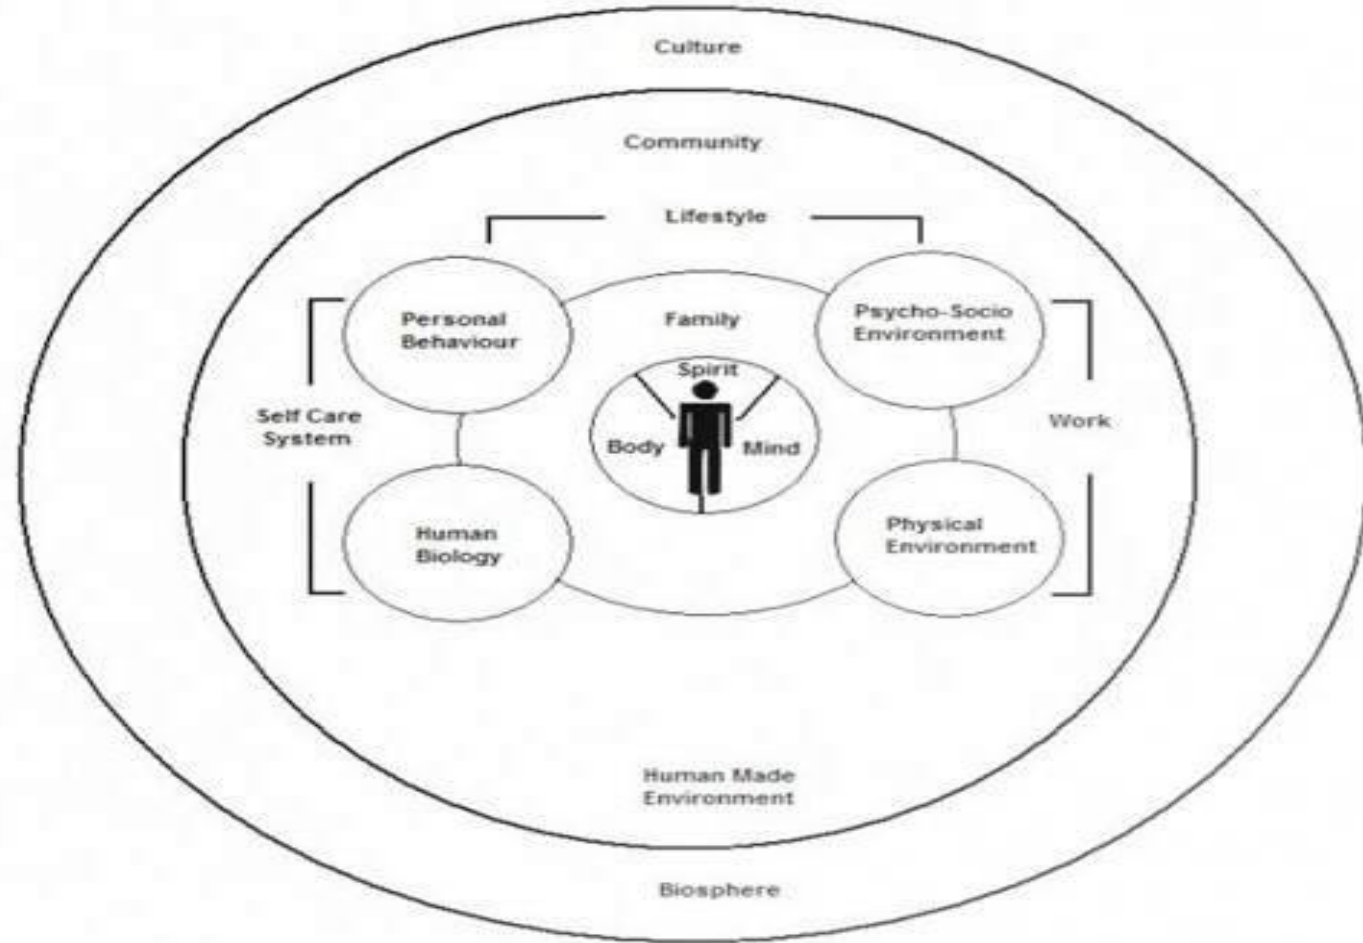

roms-totalwellness.com

Definition of Health

Health is a state of complete physical, mental and social well-being and not merely the absence of disease or infirmity.

HEALTH DISPARITIES

The Office of Health Equity in the United States defines health disparities as the **preventable factors and differences** that disproportionately affect certain people and groups.

Source: www.verywellhealth.com/health-disparities

HEALTH DISPARITY

Healthy People 2020 defines **health disparity** as:

“a particular type of **health difference** that is closely linked with social, economic, and/or environmental disadvantage”

HEALTH DISPARITIES

The Centers for Disease Control and Prevention (CDC) identifies **health disparities** as:

“**preventable differences** in the burden of disease, injury, violence, or opportunities to achieve optimal health that are experienced by socially disadvantaged populations.”

Health disparities reflect disparities in:

Income

Wealth

Political Power

Relationship between socioeconomic status and health status:

- The **higher** the socioeconomic status, the **better** the health status
- The **lower** the socioeconomic status, the **poorer** the health status

This relationship has been known to exist since the 12th century.

Known health disparities in the United States include:

Health Status

Excess Deaths

Life Expectancy

Report of the Secretary's Task Force on Black & Minority Health

Margaret M. Heckler

Secretary

U.S Department of Health and Human Services

August 1985

~40 Years Ago

Disparities Between Whites and Blacks & Other Minorities

Compared to Whites, Blacks & Other Minorities had:

Poorer Health Status

Higher Excess Deaths

Lower Life Expectancy

Report of the Secretary's Task Force on Black & Minority Health

FINDINGS:

- Disparity in health status as manifested by:

Higher than expected mortality and morbidity

Greater loss of potential years of life

Lower life expectancy

Report of the Secretary's Task Force on Black & Minority Health

FINDINGS:

- **Lack of access and underutilization of health Care services due to lack of insurance and other financial barriers**
- **Lack of available health care providers**
- **Disparities in treatment provided by healthcare providers**
- **Other barriers such as transportation and communication**

Determinants of Health

- ECONOMICS
- POLITICS
- SOCIAL FACTORS
- ENVIRONMENT
- BIOLOGICAL FACTORS
- GENETICS AND HEREDITARY
- BEHAVIORAL PRACTICES & LIFESTYLE
- DIETARY PRACTICES

Social Determinants of Health

Social Determinants of Health

Non-medical factors that influence health outcomes. They are the **conditions** in which people are

Born

Grow

Work

Live

Age

Wide set of **forces and systems** shaping the conditions of daily life.

Forces and Systems Affecting Health

Economic policies and systems

Development agendas

Political systems

Social policies

Social norms

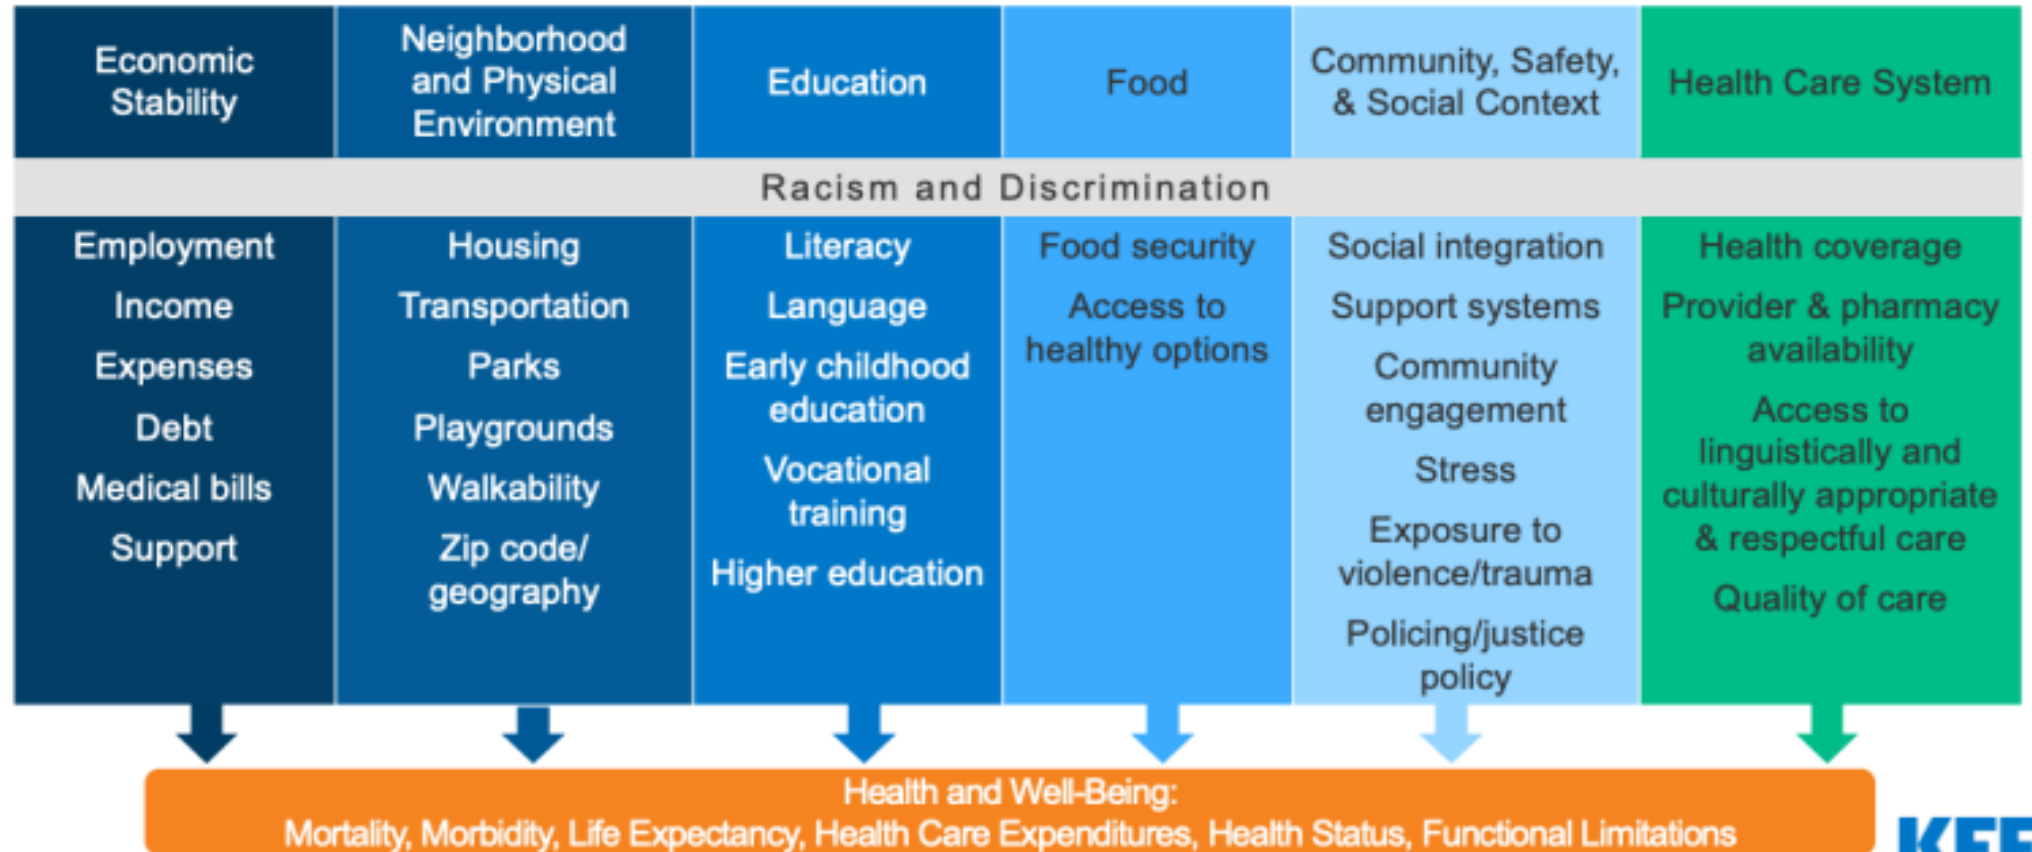

HEALTH DISPARITIES

Adversely affect groups of people who have **systematically experienced** greater obstacles to health based on:

- Race or ethnicity
- Religion
- Socioeconomic status
- Gender
- Age
- Mental health
- Cognitive, sensory, or physical disability
- Sexual orientation or gender identity
- Geographic location
- Other characteristics linked to discrimination or exclusion

Figure 1

Health Disparities are Driven by Social and Economic Inequities

KFF

RACISM

CDC defines Racism as:

structures

policies

practices

norms

that **assign value and determine opportunities** based on the way people look or the color of their skin

results in conditions that **unfairly advantage some and disadvantage others**, placing people of color at greater risk for poor health outcomes.

Social Determinants of Health

Conditions and circumstances in which people are:

Born

Grow

Live

Work

Age

Source: World Health Organization. social determinants of health. Retrieved from https://www.who.int/health-topics/social-determinants-of-health#tab=tab_1

Source: [Commission District Health Profiles | Shelby County Health Dept., TN \(shelbytnhealth.com\)](#)

These conditions and circumstances affect:

Health

Functioning

Quality-of-life

Risks

Source: World Health Organization. social determinants of health. Retrieved from https://www.who.int/health-topics/social-determinants-of-health#tab=tab_1

Source: [Commission District Health Profiles | Shelby County Health Dept., TN \(shelbytnhealth.com\)](#)

Social Determinants of Health

Shaped by the distribution of:

Money

Power

Resources

Influenced by policy choices

Mostly responsible for health inequities – unfair and avoidable differences in health status within and between populations.
